SUMMARY

Enthusiastic about continuous learning and eager to explore new experiences. Driven by curiosity and a passion for discovering innovative ideas and perspectives.

EXPERIENCE

REST Countries API **Javanrood, Iran**
Feb 2023

[Live Demo](#)

- Developed the "Countries" web application using React, showcasing detailed country information, including flags, population, capital cities, and regions in an intuitive card format. I implemented a search bar and filter options for easy access to information, and created dedicated pages for each country, featuring details on languages, borders, and currencies with seamless navigation using React Router DOM. Additionally, I offered light and dark mode options to enhance user experience.

Zinary Educational Platform **Javanrood, Iran**
Jan 2023

[Live Demo](#)

- Developed a comprehensive website for Zinary, an organization that offers educational boot camps, utilizing **HTML, CSS, Tailwind CSS, JavaScript, and React**. The platform is designed to provide an engaging user experience, showcasing various boot camp programs, detailed course descriptions, and a user-friendly interface for easy navigation. The responsive design ensures accessibility across devices, catering to the needs of aspiring learners and enhancing their educational journey.

Tv show dom **javanrood, Iran**
Dec 2023

[Live Demo](#)

- This project utilizes the TVMaze API to fetch TV show information, including title, poster, and rating. Users can search for shows by name and view results with a clean and responsive design. Interactive features include sorting by rating and viewing show details, all built using **HTML, CSS, and JavaScript** to ensure a seamless, user-friendly experience.

EDUCATION

APSignals **LONDON, UK**
July 2022 – March 2023

APSignals is a 8-month all-encompassing web development program aiming to up-skill students to become highly skilled full-stack developers and also providing work experience in the advanced course.
